INSTALAÇÃO

MySQL Server 5.1 - Setup Wizard

Setup Type

Choose the setup type that best suits your needs.

Please select a setup type.

- Typical**
Common program features will be installed. Recommended for general use.
- Complete**
All program features will be installed. (Requires the most disk space.)
- Custom**
Choose which program features you want installed and where they will be installed. Recommended for advanced users.

MySQL Server 5.1 - Setup Wizard

Wizard Completed

Setup has finished installing MySQL Server 5.1. Click Finish to exit the wizard.

- Configure the MySQL Server now**
Use this option to generate an optimized MySQL config file, setup a Windows service running on a dedicated port and to set the password for the root account.
- Register the MySQL Server now**
Use this option to register this MySQL server with SunConnect service, to receive automatic update notifications on future releases and other free offerings. A browser window will open briefly to allow you to complete the registration.

MySQL Server Instance Configuration Wizard

MySQL Server Instance Configuration
Configure the MySQL Server 5.1 server instance.

Please select a configuration type.

- Detailed Configuration**
Choose this configuration type to create the optimal server setup for this machine.
- Standard Configuration**
Use this only on machines that do not already have a MySQL server installation. This will use a general purpose configuration for the server that can be tuned manually.

CONFIGURAÇÃO PADRÃO

MySQL Server Instance Configuration Wizard

MySQL Server Instance Configuration
Configure the MySQL Server 5.1 server instance.

Please set the Windows options.

Install As Windows Service
This is the recommended way to run the MySQL server on Windows.

Service Name:

Launch the MySQL Server automatically

Include Bin Directory in Windows PATH
Check this option to include the directory containing the server / client executables in the Windows PATH variable so they can be called from the command line.

MySQL Server Instance Configuration Wizard

MySQL Server Instance Configuration
Configure the MySQL Server 5.1 server instance.

Please set the security options.

Modify Security Settings

 New root password: Enter the root password.
Confirm: Retype the password.

Enable root access from remote machines

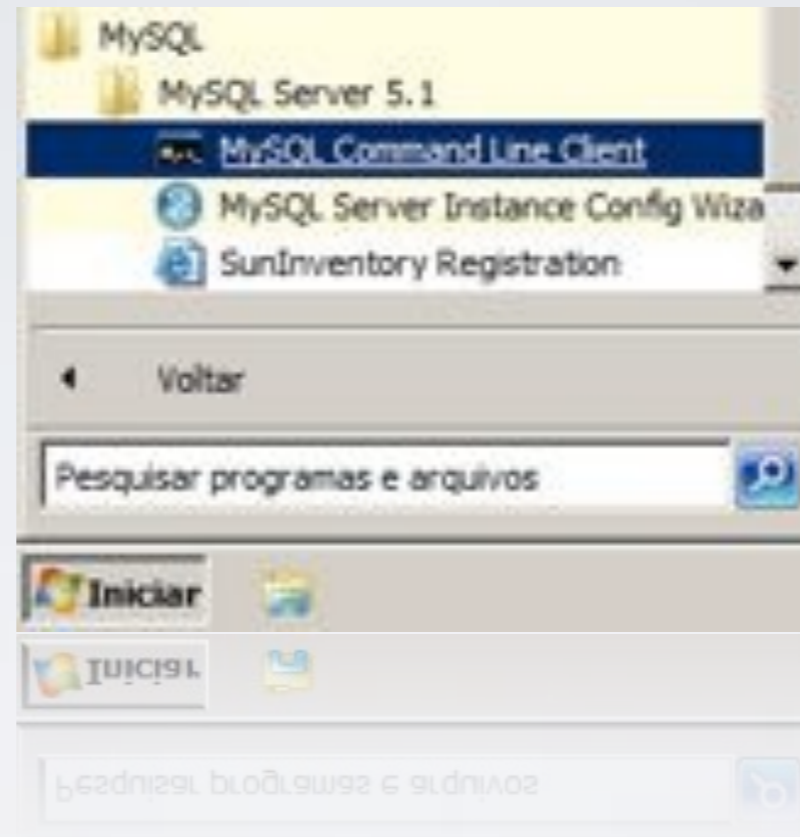

Create An Anonymous Account
This option will create an anonymous account on this server. Please note that this can lead to an insecure system.

Servidor MySQL

This is an empty package that depends on the current "best" version of mysql-server (currently mysql-server-5.1), as determined by the MySQL maintainers. Install this package if in doubt about which MySQL version you need. That will install the version recommended by the package maintainers.

MySQL é um servidor de banco de dados SQL rápido, estável e verdadeiramente multi-usuário e multi-tarefa. SQL (Structured Query Language - Linguagem Estruturada de Consulta) é a mais popular linguagem de consulta a banco de dados no mundo. Os principais objetivos buscados pelo MySQL são velocidade, robustez e facilidade de uso.

Licença: Código aberto

Preço: Gratuito

[Instalar](#) [Site](#)

Versão: 5.1.37-1ubuntu5 (mysql-server)

Canonical provê atualizações críticas para o Servidor MySQL até abril 2011.
